

Rolando JR Gaoat

Toronto, ON | rjgaoat@gmail.com | +1 (647) 290-2094 | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Senior Full-Stack Developer with 8+ years in design and engineering, building thoughtful web applications and polished user experiences with a focus on accessibility, performance, and client collaboration.

Work Experience

Senior Developer

Apr 2022 – Present

Therefore Interactive

Toronto, ON

- Architected and delivered **20+** decoupled React and Next.js applications spanning operational platforms, authenticated systems, ecommerce functionality, and complex API-driven workflows for enterprise clients.
- Reduced development time by more than **30%** and improved onboarding efficiency by standardizing TypeScript architecture patterns, reusable component libraries, and Storybook-driven workflows.
- Increased Lighthouse scores by **20+** points and reduced load times by up to **50%** by optimizing frontend performance and accessibility through SSR/SSG, caching strategies, and WCAG-compliant implementation.
- Collaborated closely with stakeholders, designers, and engineering teams throughout Agile product delivery cycles to define requirements, prioritize milestones, and align implementation with business goals.
- Mentored junior developers through pair programming, code reviews, and day-to-day frontend guidance on multiple client projects.

Computer Science Teacher

Aug 2017 - Jul 2021

Various International Schools

China

- Taught computer science courses across Ontario and UK IGCSE/A-Level programs to over **100** students through Python-based programming, interactive projects, and engaging classroom instruction.
- Guided students in STEM activities, including FIRST® LEGO® League, through programming projects, teamwork, and technical exploration.

Software Developer & Lead Designer

Jun 2015 - Jul 2017

Flipd Inc.

Toronto

- Developed a web-based analytics platform used by **30+** academic institutions to monitor student device usage through real-time reporting systems and operational data visualizations.
- Redesigned cross-platform mobile experiences across iOS and Android applications, improving usability, visual consistency, and workflow efficiency, which resulted in promotion to Lead Designer.
- Led a team of **4** developers through implementation reviews, prototyping initiatives, and feature planning to support evolving product requirements.

Technical Skills

Programming Languages

JavaScript, TypeScript, Python, PHP, SQL, GraphQL, HTML, CSS, Sass

Libraries & Frameworks

React, Next.js, Node.js, Tailwind CSS, Component Libraries, GSAP, Framer Motion, Chart.js

Platforms & Tooling

Git, CI/CD, Docker, Vite, Storybook, Playwright, Drupal, Sanity, Netlify, Vercel, Firebase, Stripe, JIRA, Figma

Featured Projects

jrInd.dev (v2)

Personal portfolio website built with Astro, React, and TypeScript with AI capabilities powered by Google Gemini.

MadReply

Web application built with Next.js, TypeScript, Firebase, and Stripe, to compose “unsent” letters for healthy expression of repressed emotions.

Oinkbooks

Full-stack web application built with Next.js, TypeScript, and Firebase, for visualising and analysing personal expenses and spending habits.

Education

University of Toronto, Ontario Institute for Studies in Education

B.Ed. – Intermediate/Senior Division,
Computer Studies & Mathematics

University of Toronto

B.Sc. (with Distinction) – Comprehensive
Specialist in Computer Science, Major in
Mathematics
