

Rolando JR Gaoat

Toronto, ON | rjgaoat@gmail.com | +1 (647) 290-2094 | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Senior Full-Stack Developer with 8+ years of experience building scalable React, Next.js, and TypeScript applications across enterprise and API-driven platforms. Specializes in frontend architecture, complex API integrations, performance optimization, and AI-assisted development workflows.

Work Experience

Senior Frontend Developer

Mar 2022 – Present

Therefore Interactive

Toronto, ON

- Architected and delivered **20+** decoupled React and Next.js applications spanning operational systems, authenticated platforms, ecommerce functionality, and complex API-driven workflows for enterprise clients.
- Reduced development time by more than **30%** and improved onboarding efficiency by standardizing TypeScript architecture patterns, reusable component libraries, and Storybook-driven workflows.
- Increased Lighthouse scores by **20+** points and reduced load times by up to **50%** by optimizing frontend performance and accessibility through SSR/SSG, caching strategies, and WCAG-compliant implementation.

Computer Science Teacher

Aug 2017 - Jul 2021

Various International Schools

China

- Delivered computer science instruction across Ontario and UK IGCSE/A-Level programs to over **100** students using Python-focused coursework and applied problem-solving methodologies.
- Integrated web and mobile technologies into classroom instruction to improve engagement through hands-on technical projects and interactive learning exercises.
- Guided students in STEM co-curricular activities, including FIRST® LEGO® League, by supporting programming, collaboration, and technical problem-solving initiatives.

Software Developer & Lead Designer

Jun 2015 - Jul 2017

Flipd Inc.

Toronto

- Developed a web-based analytics platform used by **30+** academic institutions to monitor student device usage through real-time reporting systems and operational data visualizations.
- Redesigned cross-platform mobile experiences across iOS and Android applications, improving usability, visual consistency, and workflow efficiency.
- Led a team of **4** developers through implementation reviews, prototyping initiatives, and shared architecture practices to improve delivery quality and engineering consistency.

Technical Skills

Programming Languages

JavaScript, TypeScript, HTML, CSS, Sass, Python, PHP, SQL, GraphQL

Libraries & Frameworks

React, Next.js, Node.js, Tailwind CSS, Component Libraries, GSAP, Framer Motion, Chart.js

Platforms & Tooling

Git, CI/CD, Netlify, Vercel, Drupal, Sanity, Storybook, Playwright, Firebase, Vite, Docker, Stripe, Figma, Claude, Codex, Cursor

Featured Projects

jrInd.dev (v2)

Personal portfolio website built with Astro, React, and TypeScript with AI capabilities powered by Google Gemini

MadReply

Web application built with Next.js, Typescript, Firebase, and Stripe, to compose “unsent” letters for healthy expression of repressed emotions.

Oinkbooks

Full-stack web application built with Next.js, Typescript, and Firebase, for visualising and analysing personal expenses and spending habits.

Education

University of Toronto, Ontario

Institute for Studies in Education

B.Ed. – Intermediate/Senior Division, Computer Studies & Mathematics

University of Toronto

B.Sc. (with Distinction) – Comprehensive Specialist in Computer Science, Major in Mathematics
